

# NIK-L-BLOK – ON HOLD – Under Redevelopment

- **NIK-L-BLOK™** is a revolutionary skin barrier cream based on a patented chelating formula that binds free nickel ions, blocking them from penetrating the skin when in contact with metal objects.
- 
- With an outstanding proven clinical effectiveness, the cream prevents your skin from being sensitised towards nickel as well as protects your skin against nickel induced eczema.
- **NIK-L-BLOK** traps free nickel and cobalt ions, effectively protecting your skin against eczema and prevents sensitization leading to contact allergy.

## Usage directions

Apply a protective layer of **NIK-L-BLOK** to all skin areas exposed to metal contact.

Apply as needed. Re-apply after contact with water.

For external use only. Do not use on broken skin (including pierced skin). Avoid contact with eyes.
