

Skin Marker – Medium (SMM-4)

Chemotechnique introduce the SMM-4 – Chemo Skin Mark – Medium – 4 pcs

The **Chemo Skin Markers™ - Medium** is the ideal solution for marking the patch test site or other dermatology uses. The non-sterile marker contains gentian violet ink which provides an effective means for marking the skin.

Chemo Skin Markers - Medium™ has a medium round type tip for distinct marking. It is long lasting and ideal for the marking of patch test sites. The skin friendly ink is non-toxic, non-irritating and non-tattooing.

The **Chemo Skin Markers™ - Medium 4 pcs** contains 4 pieces of skin markers.

The Skin Markers pens are **single patient use** and cost £10.00 + VAT for a pack of 4 markers.

Stored at room temperature.

Note: The marker may stain. Inform patients to wear clothing that will not ruin if discoloured.
